

This is my HQ.

GROWTH

BROADBANDTV

The world's largest multi-platform network, BroadbandTV, continues to expand their global footprint at their Vancouver headquarters. "We're committed to building on our existing momentum, and our recent launch into eight new countries is yet another example of how we're laying the foundation for our next stage of significant **GROWTH**," commented Shahrzad Rafati, Founder & CEO. This new market focus and global expansion launch takes place in parallel to BBTV's efforts to further expand in all existing markets, content verticals, and across multiple revenue streams. In addition to being the largest MPN globally, reaching 23 billion monthly impressions as well as its network of 86,000 content creators, BBTV is also the 3rd largest video property worldwide, following only Google and Facebook.
